

Probabilistic pragmatics / RSA

Bayesian listener inference

Utterance alternatives

Truthfulness constraint

Prior probabilities

Context sensitivity

extends →

SEM (novel contributions)

Social attributes as target
not meaning recovery

Motivation strategies
discrete, enumerable

Impact function $I(a|k,m)$
epistemic → social link

Empirically fitted ϕ
data-driven attribute mapping

Staged inference
 $K \rightarrow M \rightarrow \text{evaluation}$
